100% American ceramic tile company.

WHO WE ARE

Landmark is a **100% American ceramic tile company**, specialized in the production and marketing of **high quality porcelain tiles** for every possible architectural, residential or commercial use. Founded in 2013, in **Mount Pleasant, TN**, Landmark stands on a 96 acre plot, of which 700,000 sq ft are covered and has an annual production capacity of about 50 million sq ft.

OUR MISSION

High quality porcelain tiles.

Manufacture and market top quality and high aesthetic porcelain ceramic tiles in North America for every application of use, in residential, commercial and public building projects, be it for indoor or outdoor application. **Build, with its clients, long-term partnerships** by providing them with **excellent service** that is attentive to the needs of a constantly evolving market.

OUR VISION

A new landmark in the ceramic industry.

The goal of Landmark is to become a **point of reference** for all clients and operators of the porcelain tile market in the United States as well as in other markets, thanks to the breadth and the **technical and aesthetic quality** of its product range, to the **efficiency of its services** and especially to the constant attention to the needs of its clients.

OUR FACILITIES

A modern factory for an ambitious Company.

A cutting-edge site that hosts all of Landmark's departments and production equipment. Designed according to the **most modern technical and environmental criteria**, it is a technologically advanced facility that reflects the company's **forward-looking philosophy**.

Training and hospitality as a distinctive trait.

Landmark hosts customers, architects and designers, proposing guided tours, training sessions and meetings with international partners. The production plant, a **welcoming and functional space** with modern multimedia tools, boasts an innovative showroom where the potential of the product range can be experienced first-hand. Expert staff and comfortable spaces for a **pleasant and stimulating business experience**.

Business oriented comfort.

Rooms bathed in natural light designed to **maximize worker comfort** and equipped with **relaxing outdoor spaces**. A site closely focused on interaction, ideal for receiving customers in professional and welcoming indoor and outdoor showrooms.

OUR FACILITIES

The whole Landmark experience in a showroom.

The concept that inspires the Landmark showrooms reflects the values of the company and highlights its product range. Across an indoor space of **4,000 square feet**, the various worlds that inspire the collections are applied in elegant **reconstructions of residential and commercial spaces**. An experience designed to illustrate the identity of the brand in a simple and authentic way, allowing the products to express the Landmark values.

An innovative outdoor showroom.

A **2,690 square feet** showroom to demonstrate the **versatility and technical quality** of the Landmark's outdoor collections. A space designed to present the products, the installation techniques, the technical features and the ways of using porcelain stoneware in outdoor spaces.

OUR VALUES

Made in USA.

Landmark is **an American company** in terms of its vision, its people, its territory, its mentality and its products. The expertise of proven international management is combined with the energy and substance so typical of the best American industry, which makes the spirit of "Landmark" **proudly 100% Made in the USA.**

Firmness and reliability.

Landmark is part of **Gruppo Concorde**, a company founded in 1968 and one of the leading global players in the international ceramic industry. Gruppo Concorde has a dynamic vision of its mission, based on values of excellence as well as tremendous **solidity**, which enables the development of **long-term projects**, and the ability to ensure business partners, designers and customers the highest possible **reliability over time.**

A solid business project.

Landmark is not just a start-up, but a solid business project, whose aim is to carve out **a leading role in the North American ceramic tile market** thanks to its advanced technology, its technical and managerial know-how and the quality of its product and efficiency of the service.

OUR VALUES

A state-of-the-art industrial plant.

Landmark's production lines are made up of the most up-to-date **technological solutions** and **automations** to guarantee the highest reliability in the production process, the absolute quality of products, the safety of workers and a low environmental impact.

A large investment on quality standards.

Innovation in products and in technology move at the same pace. Thanks to a more than 90 million dollar investment, Landmark's production plant is equipped with the **best technologies** for the production of porcelain stoneware to guarantee the **highest technical and aesthetic standards**.

OUR VALUES

Quality without compromises.

Thanks to carefully selected raw materials, processed in accordance with advanced skills and technologies, Landmark products combine the **excellent technical standards** of porcelain tiles with **extremely sought-after aesthetic characteristics**, for results that meet even the most demanding expectations.

Respect for the environment.

The Landmark production site has been built in accordance with the highest international standards of **environmental protection**. The constant attention to **energy efficiency, recycling and re-use** of various materials and the **reduction of the impact on the environment** is evident as the company has been awarded some of the most respected **environmental certifications**.

OUR VALUES

Business ethics and social responsibility.

Landmark firmly believes that **respect**, as well as the **constant care and development of staff** is a fundamental and irreplaceable component for the success of a business and is absolutely key to the building and the increase in the value of the brand over time.

Landmark conducts its business mission by promoting a corporate culture focused on **social responsibility**, as well as on the **enhancement and respect for resources and territory**.

People: Landmark's most valuable resource.

Landmark's most valuable resource is its **human resources**. For this reason the company encourages the training and ongoing development of its team members and incentivizes a climate of reciprocal help and respect in the workplace, creating a positive environment that helps in the **team-building process**.

WHAT WE DO

Porcelain tiles for the contemporary architecture.

All Landmark collections are **made with passion** for the material, commitment and pride. Our collections meet every application requirement of **high technical and aesthetic content**, in the construction of **residential, commercial and public buildings**, for both **interior and exterior floors coverings**.

Surface finishes, contemporary looks, natural inspirations, original decors.

Nature as the source of inspiration, matter as the point of reference, style as the distinctive trait. Landmark offers a **complete and versatile range** of solutions in porcelain stoneware, designed to plan **dwelling spaces** in accordance with **contemporary living**.

WHAT WE DO

Solutions for inside & outside spaces, from residential to public.

Landmark makes quality diversified products to perfectly clad the surfaces of residential and commercial spaces, interiors and exteriors, either on floors or on walls. **From private spaces to large architecture**, the company produces ceramics targeting **consumers, architects and designers** who expect exclusive solutions made with the **utmost innovative production standards**.

From point of sale to digital services, we'll always be close at hand.

Trade fairs, advertising, merchandising tools for **point of sales** and **active product promotion**, but also **multimedia communication, digital support** and modern and **efficient online services available 24 hours**: a wide-reaching integrated network of communication and working tools make Landmark a reality that is constantly connected to the outside world, in real-time, with a single objective: to create and maintain a direct line with customers and facilitate all business operations.

Efficient logistic services through North America and abroad.

Reliability, precision and service: these are the essential requisites of Landmark logistic services. **A first rate network** created and oriented to distribute, with **punctuality** and with **quality**, products **throughout North America**.

SPACE FOR CREATIVITY

Inspired by the contemporary nature of resin, the Vision project includes porcelain stoneware surfaces for residential and commercial rooms combining a sophisticated and contemporary soul. Thanks to an evocative ceramic combination of the material that inspired it, giving a perfect balance between comfort and trendiness, architecture and design, material and color. The ceramic surface has a soft, light and elegant structure, in a range of trendy colors. The shades are a mix of greys and beiges offering many design choices. Here are creativity, passion and attention to every detail.

Color shading V2

The color of tiles printed in this catalog may differ from actual tiles. Tile color reproductions in this catalog are representative only. Slight tone and shade variations are inherent in porcelain tiles. Before selecting a color, we recommend that you contact your local representative, who will provide you with a sample piece of the requested tile.

This porcelain tile product is manufactured with a V2 shade variation. Remember that the amount of color as well as the texture of each piece may vary from tile to tile. Inspect the product immediately upon delivery and select tiles from many boxes during installation to minimize and blend any possible color difference.

TREK

FOLLOW YOUR NATURE

Traditional architecture is the inspiration for a collection of porcelain stoneware with a slate effect, offering again the timeless beauty of the graphics based on the structure of cleft slate. Intense colors and natural surface finishes provide contemporary private and public spaces with the charm of past architectural styles and a new contemporary character.

LANDMARK

WOOD

“Wood” is a gathering of porcelain tile collections that reflect **various natural wood essences**. Floor and wall surfaces accurately reproduce the **touch and look** of the natural material matching different interior decoration styles. The **authentic texture and feel of natural wood** combines with the excellent technical characteristics of landmark porcelain tile that guarantees optimal performance in every intended use both residential and commercial.

spirit

ESSENTIAL NATURE

Contemporary and minimalist, Spirit inspires ambients with a modern and authentic mood, reflecting the original soul of natural wood. Delicate veins and refined graphics add to any space a simple elegance that doesn't change over time thanks to superior technical performances of the best porcelain tiles.

RE-TRUE

DISTRESSED NATURAL MATERIAL

The surfaces of this collection of porcelain stoneware tiles have a wood effect. This effect gives the look of reclaimed boards being re-used in new contexts, bearing the marks of time, as well as machining, and paint stripping. The collection has an authentic retro look, offering a range of wood species for projects with lots of personality.

EMOTION

CHARME IS A NATURAL GIFT

Surfaces that evoke American walnut, spaces that recall the shapes of nature. With Emotion porcelain tiles the space dresses with sober elegance, for floors and walls to which time has given a marked identity. The surface is soft and natural. A slight and imperceptible micro texture evokes the warm feel of wood. Pleasant to the touch, profound atmosphere.

BEYOND TRADITIONS

Wood-look porcelain tiles rich in memories of the past gives a new look to contemporary living spaces recovering the exclusive flair of tradition. Every surface tells of a unique and unrepeatable past: the age-old look of wood represents an exclusive added value and creates a sense of authenticity and naturalness.

GRACE

NEW2019

NATURAL EXCLUSIVITY

Grace is an elegant collection that combines tasteful tone-on-tone coloring with the strength of the best porcelain tiles, bringing a restrained elegance to an array of aesthetic and design requirements. The warmth of alabastrino travertine is reflected in tiles delicately traced with different colors, conferring a natural airiness to projects of interior design.

LANDMARK
CONTEMPORARY

“Contemporary” is a gathering of porcelain tile collections for floors and walls that draws inspiration from **modern living trends**. Different materials allow for expression with renewed personality the soul of architecture interior design with a new mood. The “Landmark Contemporary” porcelain tiles feature different surface look that coexists together with other materials while the space is decorated with the latest trends and **metropolitan characteristics**.

SPACE
TO
CREATE

ATTITUDE

DESIGN FOR LIVING

Inspired by the metropolitan characteristics of cement, Attitude porcelain tiles anticipate exclusive trends for interior design thanks to their soft finish and delicate shades of color. The design project is enhanced by the hexagonal shapes and vintage decorative elements, recovering the tradition of cementine tiles reinterpreting it in a modern way.

FRONTIER20

Frontier20 is a line of porcelain pavers that is perfectly suited for the outdoors. The market's demand for a stain proof, slip resistant, chemical resistant, no maintenance product lead to the development of a revolutionary aesthetically superior product that is versatile enough for exteriors as well as interiors. Combining the highest level of quality control and technology with state of the art equipment, age old practices have been revitalized to offer a superior Industry leading product.

Frontier20 offers a never before seen dimension to your outdoor living area!

Please continue to be amazed at extremely realistic natural stone and wood look products.

PERFORMANCE, FUNCTIONALITY AND AESTHETICS: ALL IN 20 MM.

Frontier20 porcelain pavers are inherently slip resistant and impervious to chemicals, salt, fading, or scratching.

Free your self from having to commit to yearly sealing practices.

Your Frontier20 will never fade or need sealing!

Simply pressure wash your way to a newly installed look any time you want. Moss and mold also won't be an issue, they too can easily be cleaned off without fear of streaking. The ultra realistic surface of Frontier20 is physically bound and can not fade or be removed.

Frontier20 is Freedom!

EASY TO INSTALL

EASY TO KEEP CLEAN
Mild environmentally friendly detergents can be used when cleaning your porcelain pavers. Pressure washers up to 1500 PSI may be used with out fear of etching or stripping.

ANTISLIP
The structure and texture of the porcelain paver reduce the risk of slipperiness.

RESISTANT TO MOSS AND MOLDING
Landmark Frontier20 is so dense that mold and mildew are not able to establish them selves in a permanent way making removal very easy and simple.

EASY TO REPLACE AND REMOVE
When not mortared down or installed with adhesive Landmark's Frontier20 can be easily removed and repositioned in a new area.

DRIVE OVER*
When properly installed over concrete, Landmark Frontier20 porcelain pavers are suitable for light residential vehicular traffic.
(*) When installed over reinforced concrete (4" minimum) using a thinset mortar suitable for porcelain paver.

STAIN RESISTANT
Landmark's Frontier20 porcelain pavers are virtually non porous. Due to the baked on glazing process nothing can be absorbed including stains.

RESISTANT TO THERMAL SHOCK
Landmark's porcelain pavers are baked at temperatures up to 2300 degrees F which in turn causes a very strong molecular bond making for a very dense material. Due to its density it become very inert allowing for extreme and sudden temperature changes in the range of - 60 F +140 F.

SCRATCH RESISTANT
Landmark Frontier20 porcelain pavers are extremely hard with an equally hard surface making them virtually scratch proof.

FADE RESISTANT
Landmarks Frontier20 baked on graphics are created using ingredients that are completely unaffected by the sun ensuring enjoyment of your porcelain paving investment for many years to come.

FROST RESISTANT
Landmark Frontier20 porcelain pavers are so dense that frost and or freezing temperatures do not affect it.

RESISTANT TO SALTS
Landmark Frontier20 porcelain pavers are completly unaffected by use of salts.

RESISTANT TO ACID AND CHEMICALS
Landmark Frontier20 is made with inert ingredients that do not react or accept acids and or chemicals allowing you to make environmentally friendly cleaning decisions!

ECO-FRIENDLY
Landmark Frontier20 porcelain pavers are produced in our environmentally friend complex following the strictest state and federal regulations. Because of Landmarks environment friendly commitment, we can incorporate up to 20% recycled content in our usa made porcelain pavers.

NO SEALING NEEDED
No sealers are needed because Landmark Frontier20 is so dense virtually nothing can stick to it!

SAVING OVER TIME
Low maintenance cost.

COMPLETE LAYING VERSATILITY.

01

DRY LAYING.

The Frontier20 product line is so simply perfect, elegant and functional, that the challenge of installation is not "How can I install Frontier20?" but rather, "Where else do I want to install Frontier20?". Frontier20 may be installed using the traditional mortared bed, the more modern over sand and limestone, to the eco friendly permeable method, or even the budget conscious elevated deck or pedestal application.

The surface in 20mm thickness can be laid onto the substrate **without adhesives**, lending itself to applications onto **grass, gravel and sand**. Sought-after ambiance in the home come to life quickly with **incredible ease and simplicity**.

01.1 ON GRASS

The slabs are laid **dry onto a grass surface** without the need for adhesives. The external paving can easily be altered at any time and each slab can be **removed and reused**.

DRY LAY OVER GRASS (PEDESTRIAN FOOT TRAFFIC)

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20MM) PAVERS
- B BARE SOIL IS BEST. SCRATCH AND LEVEL WITH A RAKE

DRY LAY OVER GRASS ON COMPACTED ROAD BASE INSTALLATION (PEDESTRIAN FOOT TRAFFIC)

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20MM) PAVERS
- B 1" SAND BEDDING COURSE SCREED WITH SMOOTH SURFACE
- C COMPACTED ROAD

01.2 ON GRAVEL

Installing porcelain pavers over gravel can allow a cost effective means to allow for water drainage on a flat patio. Costly swales and drains are no longer necessary. Simply put down a base of 4-6" of compacted limestone (#57 limestone), screed the stone level, compact the stone and with the use of paver spacers leave a minimum 1/4" joint that will allow water to freely flow directly underneath your patio or walkway. The joint can then be filled using 1/2" stone chips or flakes. The application can also be utilized as an overlay for an array of existing substrates.

PERMEABLE APPLICATION (PEDESTRIAN FOOT TRAFFIC)

Insure the plastic 3/16" (4 mm) spacers are installed at all corners of the installed pavers, in order to prevent pavers from touching each other (and potentially chipping) and to allow better water drainage.

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20 MM) PAVERS
- B COARSENESS OF GRAVEL 2" - 8 S' AND 9 S' (1/2" + LESS)
- C COARSENESS OF GRAVEL 4" - #57 (3/4")
- D COARSENESS OF GRAVEL 6" - 3 S' - 4 S' IF DESIRED
- E FILTER FABRIC

01.3 ON SAND

Traditional concrete paver installation can also be utilized and is the ideal installation practice, especially where ground frost is common throughout the winter. 4-6" of compacted road base grade limestone should be used with a sand as a top dressing. With concrete pavers typically 3/4" - 1 1/2" of sand is common. We recommend only 3/4" of uncompacted sand. This allows for the easiest installation and allows for reconfiguration at anytime. Again a minimum of 1/4" joint should be maintained and filled in with your choice of paver sand.

Insure the plastic 3/16" (4 mm) spacers are installed at all corners of the installed pavers, in order to prevent pavers from touching each other (and potentially chipping) and to allow better water drainage.

TYPICAL FLEXIBLE BASE INSTALLATION (PEDESTRIAN FOOT TRAFFIC)

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20 MM) PAVERS
- B 3/4" UNCOMPACTED BEDDING SAND
- C 4-6" CRUSHER RUN/ROAD BASE
- D FILTER FABRIC

OVER SAND BASE INSTALLATION (PEDESTRIAN FOOT TRAFFIC)

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20 MM) PAVERS
- B APPROX. 4" OF BEDDING SAND
- C FILTER FABRIC

SAND SET OVER CONCRETE (PEDESTRIAN FOOT TRAFFIC)

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20 MM) PAVERS
- B SAND BEDDING COURSE 1"
- C FABRIC
- D EXISTING OR NEW CONCRETE 4" MINIMUM
- E 1/2" 1" INCH DRAINAGE HOLES DRILLED 24 INCH ON CENTER
- F PERIPHERAL RESTRAINT SYSTEM

02

INSTALLATION OVER REINFORCED CONCRETE*.

The Frontier20 may also be installed with traditional methods using **thinset/thickset mortar** appropriate for use with porcelain paver. In a short 24 hours your floor will be ready for foot traffic. This method offers the most stable and most durable floor covering that is able to withstand foot traffic up to light vehicular traffic.

* It is recommended installation over 4" minimum thick reinforced concrete, using a thinset/thickset mortar suitable for porcelain paver.

THIN SET MORTAR APPLICATION OVER REINFORCED CONCRETE

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20MM) PAVERS
- B THINSET
- C 3/16" MINIMUM GROUT JOINT
- D UNCOUPLING MEMBRANE
- E EXISTING OR NEW CONCRETE (REINFORCED). 4" MINIMUM

03

INSTALLATION OVER DECKING.

Landmark Ceramic's Frontier20 combined with a **grate system** allows porcelain paving to be utilized in conjunction with an existing or new construction **wood deck structure**. As long as the wooden deck structure is constructed soundly and according to local codes, the honeycomb plastic grate is installed as the substrate for the porcelain paver. This system is highly innovative and functional for the design of contemporary outdoor spaces.

INSTALLATION OVER DECKING (PEDESTRIAN FOOT TRAFFIC)

Insure the plastic 3/16" (4 mm) spacers are installed at all corners of the installed pavers, in order to prevent pavers from touching each other (and potentially chipping) and to allow better water drainage.

- A FRONTIER20 PORCELAIN 3/4" NOMINAL (20MM) PAVERS
- B OUTDOOR FABRIC OR SOUND DAMPERING MATTRESS
- C HONEYCOMB PLASTIC GRATE
- D DECK JOISTS

04

RAISED FLOORS.

In combination with a suitable structure the **Frontier20 porcelain paver** in 20mm thickness lend themselves perfectly to floors with a **suspended installation**. The adjustable stand means being able to create an air space under the floor in which to lay electrical conduit or plumbing. The raised flooring system is easy to manage, allows you to configure the underlying wiring or plumbing systems based on specific needs and also to change its configuration any time a new look is needed.

LOW HEIGHT SUPPORTS (UP TO 3/4" - 20 MM) PEDESTAL INSTALLATION OVER EXISTING SUBSTRATE (PEDESTRIAN FOOT TRAFFIC)

- B 3/4" PEDESTAL
- C CONCRETE BASE
- D SUBGRADE

RAISED FLOORS INSTALLATION SYSTEM.

WARNINGS.

If the application of the 20 mm slabs requires the ceramic product used in structural installations, the project engineer and/or customer must carefully assess the project requirements with regard to the technical specifications of the slabs. To prevent the risk of damage or injury, the manufacturer recommends: with regard to a raised floor installation a ceramic slab may fracture on impact if a heavy object falls on it from any significant height. Therefore the manufacturer recommends to check the specific intended use before starting the installation and to follow table for raised installation provided below. In certain conditions, reinforcing must be applied on the back of the slabs (double fiberglass mesh) supplied and applied by the manufacturer; with reference to any dry installation system of flooring above the ground level, the manufacturer recommends to comply with local regulations and conditions of use with regard to wind-load, loadbearing, seismic events, etc.

Failure to comply with these recommendations may lead to improper use of the product and could cause serious damage or injury.

For further information and recommendations concerning the installation systems please refer to <https://hardscape.landmarkceramics.com> website.

NOTE.

For any detail and technical specification concerning the double fiberglass mesh, please contact Landmark Ceramics. Landmark is responsible only if it supplies the whole system (paver + double fiber mesh). Landmark cannot be held responsible for reinforcing systems that has not supplied.

In case of breakage, paver must be replaced immediately.

RECOMMENDATIONS FOR THE INSTALLATION, ORDINARY CLEANING AND MAINTENANCE OF FRONTIER20.

Landmark Ceramics recommends carrying out the procedures for the ordinary cleaning of Frontier20 floor surfaces using water and commercially available neutral detergents: the inclination of the surface and the space between adjacent slabs for dry-system installation favour the natural flow of water. However, it is important to take into consideration that any type of floor surface is subject to the surface tension effect of liquids: it is the same property of water that gives the tendency to transform into spherical droplets and which cause the curved top surface of a glass full of water. The surface tension can obstacle the complete drainage of water and cause a temporary stagnation of liquid on the slab edges. In order to avoid this problem, Landmark Ceramics recommends ensuring adequate inclination of the surface during installation so as to encourage the flow of water between adjacent slabs. Please remember in any case that, in view of the distinctive advantages of porcelain stoneware, Frontier20 absorbs practically no water, which makes it highly frost-proof. This may lead to localised water pooling, mainly on the edges of the pavers, independently of the manner and quality of the laying. Laying is also recommended with a minimum gap of 4 mm (5/32"). Should liquid deposit on the surface, it is recommended to push it towards grout lines using a brush or remove it with a wet and dry vacuum cleaner.

Backing with double fiberglass mesh.

A COMPLETE PROJECT FOR EVERY NEED.

FRONTIER20: EXTERIOR DESIGN WITH A DIFFERENT STYLE.

Frontier20 is a complete project for any design need, specially developed by Landmark for contemporary outdoor spaces. The extent of the range makes it possible to design outdoor environments with looks that are always new, and to play with surfaces inspired by different materials.

ADVANTAGES.

- WIDE LOOKS RANGE
- PRODUCTS INSPIRED BY MOST POPULAR AMERICAN STONES
- A WIDE RANGE OF SIZES
- **M.P.D.** - MULTI PATTERN DESIGN PROJECT
- WIDE CHOICE OF TRIM PIECES

PROJECT
FLOOR DESIGN
Frontier20 Silver Quartz - 24"x24"

PROJECT
FLOOR DESIGN
Frontier20 Soul Walnut - 12"x48"

Frontier20 includes American Stone, a selection of porcelain stoneware surfaces inspired by typical American stones. To this is added the Multi Pattern Design project, which completes the range with new formats for the creation of innovative installation solutions that arise from the combination of multiple sizes.

THE AMERICAN SOUL OF THE REAL AMERICAN STONES.

PROJECT
FLOOR DESIGN
Frontier20 Bluestone Blue Select - 24"x24"

Frontier20 American Stone is a collection of some of the most regionally popular natural stones from across the nation. Elegant rangy Bluestone from the North East, earth tone tans browns from the desert south west to the classic heartland Cherokee pinks, tans and coffee brown, even the pacific northwest's deep charcoals and grey. The American Stone range also includes prestigious travertine cut against the vein, a stone commonly found in the southwest distinguished by the timeless beauty and appeal of the original material. Naturally inspired color that are rich, sophisticated and bold enough to make a statement yet versatile enough to seamlessly blend your home's interior charm with your outdoor living area.

AMERICANSTONE ★

Unlike natural stone, American Stone is uniform in thickness and consistent in size, affording the most in design flexibility and cost saving installation. American Stone is extremely durable, will never fade, impervious to chemicals or salts, can be easily cleaned without harsh chemicals and never needs sealed. **Landmark's American Stone is freedom.**

A WIDE RANGE OF DIFFERENT SIZES.

DIFFERENT SIZES, GREATER FREEDOM.

Frontier20 is characterized by a wide range of sizes from the small **12"x12"** and **12"x24"** up to the bigger **18"x36"** and **24"x48"**, from the classic **24"x24"** to the refined **12"x48"** and **16"x48"** plank size. Frontier20 ensures freedom in every design project.

M.P.D.

MULTI PATTERN DESIGN

The **Multi Pattern Design** (M.P.D.) is a project designed to allow combination of multiple size patterns and therefore develop creative and original outdoor design solutions. M.P.D. project is available in two different versions:

- **M.P.D. Big:** allows multiple big size patterns made by using 4 formats (24"x48", 24"x36", 24"x24", 12"x24")
- **M.P.D. Small:** combines 12"x12", 12"x24" and 24"x24" formats to create smaller size patterns.

The color of pavers printed in this catalog may differ from actual pavers. Paver color reproductions in this catalog are representative only. Slight tone and shade variations are inherent in porcelain pavers. Before selecting a color, we recommend that you contact your local representative, who will provide you with a sample piece of the requested paver.

This porcelain paver product is manufactured with a V2/V3/V4 shade variation. Remember that the amount of color as well as the texture of each piece may vary from paver to paver. Inspect the product immediately upon delivery and select pavers from many boxes during installation to minimize and blend any possible color difference.

INSTALLATION INFORMATION AND RECOMMENDATIONS.

INSTALLATION INFORMATION AND RECOMMENDATIONS.

Specific details and instructions are given for each of the following installation options. Different climates and geographical locations will affect the thickness of the base. Depending on the location, contractors will install the standard base thickness to install porcelain pavers for the needs of the area. When installing porcelain pavers, the bedding course sand must be pre-compacted and then struck off with a screed to the required thickness as shown in the drawings. Before the laying of the porcelain pavers, the sand layer underneath must be pre-compacted. The sand layer needs a 5 to 6% moisture content to insure a smooth strike off finish.

Compacting dry sand will not give the desired results.

- Only use a paver saw with a wet cut porcelain blade to wet cut porcelain pavers.
- Before installing your porcelain pavers in sand set installations, pre-compact and strike off your sand leveling course.
- Plastic $\frac{3}{16}$ " (4 mm) spacers must always be used to install pavers on sand set and permeable installations. The photo on the right illustrates the use of the $\frac{3}{16}$ " spacer to support and space the 4 paver corners.
- Never install pavers with porcelain to porcelain contact.
- The use of plate compactors is not recommended to be used on the porcelain pavers.

JOINT FILLING

When installing porcelain paver on sand set base, fill the 4 mm (approx $\frac{3}{16}$ ") paver joints with these options:

Traditional sand

Fill the open joints with traditional dry sand until completely filled. Sweep any excess sand off the pavers. Refilling of the joints with sand may be needed in the future due to wind and rain erosion.

Polymeric sand

Polymeric sand is a blend of polymers which harden when subjected to moisture. Sweep the sand into the open joints until completely filled. All excess sand and dust must be swept from the surface. Use a blower for the final dust removal to make certain all excess sand is removed. Any residual sand or dust can result in staining of the surface. Once the filling of the joints and the cleaning of the surface is complete, mist the pavement with water which activates the polymer and cures the mixture.

HANDLING AND SPECIALTY TOOLS.

Porcelain paver pallets are shipped with a very strong plastic covering and the individual units are packaged in protective cardboard boxes. The protective cardboard boxes guard them from the possibility of chipping.

The handling of multiple loose stones can result in damaging or chipping of the pavers. Protect any un-used boxed pavers from the elements once the plastic shipping cover is removed.

This insures the integrity of the protective cardboard boxes.

Wet cut paver saw is used to cut paver accurately and cleanly to fit around edges and corners. The saw must be equipped with a diamond blade manufactured for wet cutting porcelain and designed to safely cut a 24" (60 cm) length porcelain paver.

A paver clamp to easily handle the installation and removal of pavers. Gloves are highly recommended while handling and installing porcelain slabs to protect the hands from injury. Notched trowels and grout float tools for cementitious adhesive and grout installation. Follow the adhesive and grout manufacturer's recommendations to select the appropriate tools needed for application.

IMPORTANT NOTE: LEGAL DISCLAIMER

The nominal measurements include 4 mm (approx $\frac{3}{16}$ ") for product spacers which are sold separately. Although extreme care has been taken to ensure the accuracy of all measurements set forth herein, manufacturer assumes no liability relating thereto.

IMPORTANT NOTES:

1. Use the manufacturer's instructions when choosing polymeric sand for your project.
2. The use of cement blended sand and polymeric sand can reduce plant growth and insect infiltration within the joint infill material.
3. Whether using traditional sand or a cemented blended sand, ensure the gradation of the sand is fine enough to pass through and fill the $\frac{3}{16}$ " (4 mm) joints.

INFORMATION

RECOMMENDED USE FOR 9 MM THICK - MATT FINISH PRODUCTS (ALL COLLECTIONS)

These products are recommended for indoor floors, walls, countertops, and outdoor walls in commercial and residential application. The use of these products is not recommended for horizontal exterior surfaces that require anti-slip features. Landmark recommends an offset no greater than 30%. If a staggered pattern is required for tiles of 20" inches or longer. Visit lcusa.com for detailed instructions of installation.

RECOMMENDED USE FOR 9 MM THICK - HONED AND LUX FINISH PRODUCTS (ALL COLLECTIONS)

These products are recommended for indoor floors, walls, countertops, and outdoor walls in commercial and residential application. The use of these products is not recommended for horizontal exterior surfaces that require anti-slip features. We do recommend not using the honed and Lux finish for wet areas where deposits of water are likely to occur. Landmark recommends an offset no greater than 30%. If a staggered pattern is required for tiles of 20" inches or longer. Visit lcusa.com for detailed instructions of installation.

RECOMMENDED USE FOR 20 MM THICK PRODUCTS (ALL COLLECTIONS)

These products are recommended for indoor floors, walls, countertops, and outdoor floor and walls in commercial and residential application. Landmark recommends an offset no greater than 30%. If a staggered pattern is required for tiles of 20" inches or longer. Visit lcusa.com for detailed instructions of installation.

CARE AND MAINTENANCE

Do not apply any wax or sealer to the product after installation. Before grouting ensure that you apply a grout release when using honed or lux finish. Regular cleaning is the best way to keep Magnifica, Charme, Charme Lux tiles looking good. Use clean, hot water (add household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth to prevent water spots. Please visit lcusa.com. For further information regarding the care and maintenance of Landmark products.

The use of the Lux finish is limited to wall cladding and floor application in residential venues and in spaces subject to low footfall, avoiding the direct contact with outdoor areas which require anti-slip features.

WARRANTY

Landmark guarantees that its products will meet or exceed the performance specifications set out in ANSI A137.1- 2012 and in the performance specifications section of this catalog. For more information, please visit our website at lcusa.com.

Laying and cleaning information

LAYING SUGGESTIONS / FINAL FLOOR CLEANING

Laying suggestions.

Foundation layer, joints.

When large areas must be tiled, it is necessary to pay great attention when designing the foundation structures which must take the following elements into account.

- EXPANSION DUE TO HEAT
- DEFORMATION AND SPLITTING DUE TO SHRINKAGE
- STRUCTURAL SETTling

The presence of an insulating layer (like vermiculite or opencell clay) in the foundation could lead to possible settling due to lesser resistance of this material to compression. This inconvenience can be avoided by adding electrowelded netting to the foundation. The mortar forming the laying surface, which should be at least 5 cm thick, should have the following composition: WASHED SAND (Ø MAX 0,3 mm) 1 m³/CEMENT 325:200 Kg., WATER 80-100 l iters. When spreading the mechanically mixed material, it is advisable to limit the laying area in order to always ensure a wet surface. It is advisable to break up large areas into sectors measuring 4x4 or 5x5 m.

Insert polystyrene or polyurethane foam strips whenever continuing with the casting. These strips should be about 1 cm wide and should be as thick as the foundation layer (construction joints). These joints should also be made along perimeter walls and near columns and stairways (desolation joints). It is very important to match the bed joints with those of the flooring. Two methods exist for laying tiles: they can be laid side by side, in a continuous fashion, which is called "CLOSED JOINT" (Fig. 1 A), or leaving consistent spaces between tiles. This is called "OPEN JOINT" (Fig. 1 B); the recommended gap is 2-3 mm. An advantage of the open joint method is to favor structure setting therefore consenting a better overall adaption of the flooring to the technical-structural variations.

"EXPANSION JOINTS" (Fig. 2 and 3): they are extremely important and a lot of attention must be given towards their realization.

They are needed to compensate variations or deformations and they allow thermal and hygroscopic expansions of the mortar bed.

Fig. 1A

- structure joint

Laying.

The flooring can be laid either traditionally with cement or with adhesive.

1) In the event of traditional laying, this will be achieved in the same way as a normal ceramic floor by adapting certain expedients:

- The material should not be immersed in water before laying;
- The cement dusting must be increased to 5-8 Kg/m²;
- Tap the floor with the appropriate device until liquid cement escapes from the gaps.

2) When laying with adhesives, which is preferable, we recommend, using cement-based or organic adhesives with the addition of resinous latex additives:

- Preparing the subsurface thoroughly: ensure that it is perfectly flat, without cracks and well cleaned.
- Preparing the adhesive: mix all ingredients mechanically or by hand, leaving to stand for about 10-15 minutes.
- Applying the adhesive and laying the tiles: spread with a special notched spreader over small areas; apply the tiles by pressing on the surface: try to detach a few tiles to check adhesion.

Grouting the joints.

It is necessary to take into consideration that, while preparing the grout, the dosage of water (and/or latex) must strictly follow the instructions without diluting it excessively and that grouts must be selected according to their granulometry and depending on the width of the grout lines. After grouting using cement grouts (for epoxy grouts the procedure is totally different therefore please consult our on-line handbook or that of the manufacturer), it is necessary to wait for a short period of time, ranging from a few minutes to a few hours depending on weather conditions, until the grout becomes opaque, then it is possible to proceed with the removal of excess grout using a clean and slightly wet sponge. After a period of around 48 hours, the first cleaning of the entire tiled surface can be carried out.

The grouting of the joints must be done the day after the laying. The joints must be completely clean throughout their entire body. The underside and edges of the tile must be carefully soaked. The grouting and the jointing must be performed with prepared grout found on the market. The joints are normally grouted with rubber spatulas, letting the grout penetrate the depths. Everything is left to dry. When the sealant starts to take hold, the excess should then be removed with a wet sponge.

N.B.: It is not advised to use sand or sawdust that digs into and removes the grout that is still fresh from the joints. We also advise against the use of colored grouts that, if not removed in the appropriate amount of time, can leave deposits on the tiles that are difficult to remove. For more detailed information, consult www.lcusa.com.

Final floor cleaning

First floor deep cleaning after installation

After Grouting the Joints (pic. 1) It is important to remove the excess grout with a sponge and clear water (pic. 2). After 12/48 hours, the grout in the joints will have "set up"/hardened significantly. There will be a noticeable residual "haze". Typically, a diluted acid cleaner specifically for removing "Grout Haze", combined with a soft scrubbing pad will remove the majority if not all the "Haze". Change your acid/water solution frequently for best results. It is also recommended to keep a bucket of clean water to remove the acid/water solution. It is recommended to keep and use clean dry towels to help remove as much residual water and keep the floor as dry as possible.

Please refer to the cleaning chemical company's suggested methods and dilution rates. (pic. 3). For areas with excess grout or grout that becomes adhered to the face of the tile, further cleaning with an Acid/Water Solution may be necessary. Please refer to the Cleaning Chemical Company's instructions as not all acids or chemicals are the same.

The excess grout residue (pic. 4-5) must be removed so that it does not dry and stick on the surface. It is necessary to change the cleaning water frequently and rinse well. Care must be taken on inlayed, polished and especially Anti Slip products similar to Frontier20. The use of a floor-washing machine combined with the use of a diluted acid detergent helps reach the spaces between adjacent tiles and clean them properly. If such a cleaning procedure is not carried out, or if such cleaning is carried out too late, the grout residue creates an absorbent film, which holds dirt, making the surface difficult to clean: in this case, **Landmark Ceramics** will not be liable for any damage caused to the surface.

Ordinary cleaning

Ordinary maintenance must be carried out using specialized detergents to remove stains but these detergents must not leave a wax, film or membrane residue. Rinsing well with plenty of clean water is a fundamental part of the cleaning procedure, therefore we advise against the use of products which state that they "do not need rinsing".

Other recommendations

Bright colored products, in particular white and extra-white tiles, are very delicate and, although for all intent and purpose are hygienically clean, However, they can get dirty more easily than darker tiles. It is therefore necessary to remember that these particular products require careful regular maintenance. Sealers are unnecessary. Sealing will change the D.C.O.F. (Dynamic Co-efficient of Friction) resulting in a surface that will become more slippery. Also because Porcelain has such a low absorption the sealer will unlikely stick and most likely the sealer will flake off over time.

PIC 1.
Fill joint with grout.

PIC 2.
Remove excess grout with clean water.

PIC 3.
Add specific acid cleaning agent for porcelain tile to clean water.

PIC 4.
First floor deep cleaning after 12/48 h from installation.

PIC 5.
Removal of excess grout residues with hard brush.

N.B. When using the above products, the instructions on the package should be followed.

* **Detergent with an acid base:** a detergent with an acid basis, specifically recommended after bath floor or wall installation, for the decalcioficant cleaning and the regular maintenance.

** **Limited foam type product:** a limited foam type product degreasing and general cleaning, suitable for all types of stains but especially for remove of vegetable and animals fats.

Warning.

The above suggestions are a result of research, laboratory tests and several years' experience. However, the cleaning features of the materials may vary significantly according to the different installation methods, conditions of use, types of surface and destination. As a general rule, the higher the anti-slip values of the tiles are, the greater cleaning inconveniences may arise.

The professional operator in charge of maintenance and cleaning shall always check the surface condition before proceeding with any cleaning and/or maintenance operation (we would suggest to test some tiles before installation). **Landmark Ceramics** declines any liability with reference to cleaning and maintenance operations in case of heavy conditions of use (such as mechanical workshop or spaces presenting oily residues or tire marks), bad installation work or wrong cleaning operations, it is agreed that **Landmark Ceramics** shall not be liable for any event, damage or defect due to wrong installation of the tiles, faulty cleaning and maintenance operations or inadequate choice of the type of material to be laid or of the adhesives used in a certain destination of use.

Tones of samples.

Landmark Ceramics reserves the right to modify the products illustrated in this catalog for reasons of production or to improve quality. Samples are purely indicative. Packaging and weights may vary for production reasons. Contact our sales department when ordering.
